tion of Italy's Late Sovereign and Queen.

on the Rio dos Mortes in Brazil.

Special Correspondence to THE STX. ROME, April 20 .- The Duchess Eugenia Litta, who died recently at the age of 78 years, was considered the most beautiful

leave him unless he gave up the Duchess have affirmed? Litta. Prince Humbert's father, King Victor Emmanuel II., then cancelled the Duchess' name from the court list, and after 1875 she was no longer invited to court. As her villa at Monza was near the royal villa, where King Humbert was assassinated in 1900, the friendship between the Duchess and the King continued on the siy.

The Duchess's second son, Alfonso, who

died in 1891, was supposed to have had king Humbert as his father. When he died the King left Rome suddenly and

King's body.

The Duchess was so beautiful that when only a girl she inspired Balzac to write his novel "Une fille d'Eve," which he dedicated to her mother. The sculptor Vincenzo Vela used the Duchess as a modal for his splendid statue representhe dedicated to her mother. The sculptor Vincenzo, Vela used the Duchess as a model for his splendid statue representing a kneeling girl and entitled "The Morning Prayer." After her son's death, followed by King Humbert's assassination, the Duchess lived in the utmost sections on She cave large sums to charity. clusion. She gave large sums to charity, endowed hospitals, built churches and gave the Milan museums many of her art objects, as well as the famous portrait of Antonio Porcia, one of her ancestors,

Missionaries Discover Waterfall.

Father Colbacchini of the Salesian Order, founded by Don Bosco, which has important missions among the Indians of Brazil, reports the discovery of a great waterfall on the Rio das Mortes in the Matte Grosso, which he named after Pius X. As Col. Roosevelt is exploring the plateau of the Matto Grosso and may re-discover the waterfall, it may not prove amiss to reproduce Father Colbacchini's short report, just published in the Sale-

tian bulletin.

The Rio das Mortes, which is from benarrows down gradually to about eight

Church of Cardinal O'Connell.

Rome, April 22.—A very rare marble statue, representing the Redeemer carry-big a lamb on His shoulders, has been bloden from San Clemente, the titular church of Cardinal O'Connell, Archibop of Bosion, at whose expense the underground church is now being drained. Two workmen carried the statue away and took it to a dealer, who refused to buy it for \$20. The workmen realized the statue was practically worthless had in order to get rid of it offered to stell it for a lower price but just then the police arrested them and sequestrated the statue, which will shortly be returned to San Clemente.

Texpect the blood diagnosis—the sero-diagnosis of the blood—to furnish us with very valuable remedies. We shall be able to fight diseases in two ways on the basis of blood diagnosis:

"1. By being able to recognize the nature of the illness much more quickly than is possible to-day and thus to increase very considerably the probability of curative results.

"2. By learning how to produce the protective ferments hitherto only created by nature, and to apply them to cure the maladies of the inner organs, just as we already make use of sero-therapeutics for certain infectious diseases."

INSPIRED BALZAC NOVEL DEVELOPS THE KOCH IDEA

Missionaries Discover Waterfall Hopes to Discover Remedies for Many Diseases at Present "Incurable."

Special Correspondence to Tan Sun. HALLE, Germany, April 22 .-- A question on which the interest of medical men in Europe is concentrated is this: Does the roman in Italy, and it is an open secret diagnosis based on an analysis of the that the late King Humbert was madly blood of the patient by the well known when the Kins was Crown Prince and already married to his cousin, Margherita of Savoy, the present Queen Dowager, it is reported that his wife threatened to lave him unless he gave up the Duchess have him unless he gave up the Duchess have affirmed?

The Duchess's second son, Alfonso, who died in 1891, was supposed to have had King Humbert as his father. When he died the King left Rome suddenly and deed the King left work as a solution of the body was buried. When King Humbert was assasburied. When King Humbert was assasburied. When King Humbert was assasburied Queen Margherita sent a court chaplain to fetch the Duchess from her villa close by and allowed her to see the King's body.

The Duchess was so heautiful that

> therapeutics made by Koch twenty years before had opened a new epoch in the history of medical science. Koch had proved that the human as well as the animal organism reacts against invading bacteria, "xenogeneous" bodies as science calls them, by producing protective sub-stances. The object of these protective substances is to annihilate the bacteria in the blood. Generally these sub-stances show certain characteristics that make it easy to ascertain their pres-ence. Thus a possibility was found to recognize certain infectious diseases at an early stage by an examination of the blood. But the discovery of Koch has not only shown the way to a rapid diagnosis of the nature of the illness; it has also enabled us to fight the disease with the aid of the protective or better annihilating substances produced by nature herself.

Natural Weapone Strengthened.

Animals are vaccinated with the bacteria provoking some special illness; oil as a treatment for open wounds and these animals sicken and form in their ulcers is not modern. Ambroise Pare, blood certain protegive substances. The master of French surgery, employed blood of these animals, impregnated with blood of these animals, impregnated with these substances, is then introduced as waters dashes down through a mass of high rocks in a wonderful waterfall more than 500 meters long. Father Colbacchini had the name of Pius X, cut in a rock near the waterfall and erected a large cross made from the branches of two trees on the brink of the water. He then explored the lower course of the river.

The surface of the region crossed by Father Colbacchini and his party of Bororos is covered by strata of sandstone deeply croded and indented by water and the river basin was surrounded by ridges and ranges of hills.

blood of these animals, impregnated with these substances, is then introduced as soldiers about 400 years ago. But such as treatment has just come to the fore-front of medical discussion by the communication addressed to the Academy of Medicine by Dr. Barthe de Sandfort, who has been experimenting along this line for the last thirteen years. Lover's Message on Vase.

At a recent meeting of the Pontineal Archeological Academy of Rome, Father Joseph Bonavenia read a paper giving an interpretation of an inscription scratched on a vase found near the Quirinal some please of the same rows around the vase from the name of the discrete without any space between the words and it runs in three rows around the vase. Repeated efforts at Interpretation of this inscription proved faultless and many archaeologists gave up the task in despair.

The following is the inscription as to the continuous heads and many archaeologists gave up the task in despair.

The following is the inscription as to the continuous heads and many archaeologists gave up the task in despair.

The following is the inscription as to the continuous heads are the words on the vase:

IOVESATE INVOSQUIMEDMITATNELL TEDENDOCSOMISVIRCOSIEDASTEDN. OISNOPPECEDENMANOSTATOD.

After long and patient study Father Bonaveria discovered that the inscription was in archael Latin and he succeeded in dividing it and explaining it as follows:

IOVESAT (luverit) DEIVOS (deus) QOI (qui) MED (me) TED (te) ENDO (intus) (SO (rupes) MIS (mi) VIRCO (virgo)) (sour post of the continuous heads of the treatment by serum to the discovery of the timen the whole discovery of the treatment by serum to the discovery of the treatment of the discovery of the treatment of the successive to the vase;

IOVESAT (luverit) DEIVOS (deus) QOI (qui) MED (me) MITAT (mittit) NEI (nec) TED (te) ENDO (intus) (SO (rupes) MIS (mi) VIRCO (virgo) and continuous heads are understanted by the serum but the same has come down to us as the father of the high members of the lung of the l

brain, the positive of the experiment shows that the caused turbances of the brain cells are caused by the thyroid gland supplying the brain insufficiently with this necessary secretion. Thus the doctor knows exactly where his treatment has to begin.

Baroness Teresina Canarda, who, it is said, was killed by her brothers.

R OME, April 21.—The mystery of the Calabrian Baroness, Isabella Camarda, who, it is alleged, has been imprisoned in a dungeon at the Casime Pime for eighteen years by her backbare. for eighteen years by her brothers, has not been cleared up. Isabella Camarda is still under observation at the lunatic asylum of Grifalco, and Dr. Sasso says there is not the least doubt as to her being hopelessly insane.

Every effort to obtain information from the patient has proved fruitless, owing to her almost complete loss of memory. She speaks of a certain Teresina, who, she says, was her only friend and shared her captivity. When asked whether Teresina, who was her sister, had any children she answered vaguely that she had a doll which she buried under a heap of olive stones in the dungeon. The judicial authorities will depute an examining judge to take Isabella Camarda's evidence as soon as her condition is sufficiently improved, and if necessary further investigations will follow in the Casime Pime with the object of searching for the body of Teresina's baby.

The two brothers have not been arrested, and it is stated that every effort is being made to hush up the scandal. Many influential members of Parliament, who owe their election to the Camardas' power, have almost succeeded in persuading the judicial authorities that Isabella is not the sister of the Barons, and as no doubt exists as to her being mad her imprisonment in a cellar was justified. In any case, it has been pointed out that keeping a mad woman in confinement does not constitute a crime

The friends of the Camardas insist that the story is a mere invention of their political enemies, that Isabella has always been insane and that her sister died a natural death, adding that neither of the sisters ever had children. According to the latest reports from Majorano the brothers and their sister have not been seen for five days and it is suspected that fearing arrest they have gone

The accompanying photographs and pencil sketch have been sent by a correspondent at Pizzo. The pencil sketch, by Dr. Sasso of the Interprovincial Asylum of Grifalco, was made when Isabella was taken out of the dungeon where she spent eighteen years in a savage state.

GREECE BLAMED FOR UPRISING IN EPIRUS

Prince of Wied's Long Delay in Accepting Throne Also Responsible.

BANDITS ARE WELL ARMED

Said to Include Many Greek Soldiers, With Officers of Same Nationality.

By Dr. WOLF VON SCHIERBRAND. VIENNA, April 22.-The Government and the people of Austria-Hungary are intensely interested in the present occurrences in Albania and greatly desire that the new ruler there and his advisers may weather the storm that is now blowing in northern Epirus.

Well informed persons feel all the more indignant at what they construe as Greek perfidy because Premier Venizelos at his visit here not long ago assured both the aged Emperor and Count Berchtold in the most solemn manner that Greece would loyally carry out the programme of evacuation agreed upon between the big Powers. Advices since received here from Athens, however, show the facts to be these: That

however, show the facts to be these: That after his return from his European circular trip Venizeios as well as King Constantine of Greece found popular sentiment too strong to combat with success.

The whole Greek army especially was and still is in favor of retaining northern Epirus. Threatening letters even were sent to the King if he should abandon "Hellenic soil." A large number of active Greek army officers resigned and joined the insurgents, aiding greatly in organizing the sacred battalions.

TOU HAVE TO BARGAIN

AT PARIS HAM FAIR

There in Vienna, as well as in Rome, there is also a feeling that part of the blame for existing conditions justly attaches to the Triple Entente. It is argued that if Russia, France and England had used as much expedition as the Drelbund in answering the last dreular note of Greece as to the proper date at which the last remaining regular Greek troops must absolutely evacuate those Epirote. must absolutely evacuate those Epirote districts awarded to Albania instead of delaying more than a month Greece would not have dared to employ such doubtfu methods. But Greece, it is here claimed counted on the moral support of at least GIRL BUYS MARAT'S BATH Russia and her two allies, France and England, had first to await Russia's decision and then modify their own into the
